

## **Clerks Report (Includes Matters Arising from September meeting) – November 2017**

Circulated prior to the meeting with the agenda, please indicate to the Chair if there are any comments or queries during the meeting for this item.

**Moles (playing field and cemetery)** – Further report and invoice received and there has been generally a lot of mole activity.

**Willow Tree A134** – This was reported to Highways and also chased, they advised they were sending a technician.

**Defibrillator Training Update** – There is no deadline for the training. Martin who conducted the training is very ill and therefore there has been a delay in them being able to offer alternative arrangements. The Clerk will be progressing the best possible date to attract as many people as possible. It might be worth doing in the new year.

**Flies Newsletter from Environment Agency** – Added to the Website.

**Dead Willow Tree** – Alex has this on his schedule he has advised this is something that needs doing but not urgently and is fine to wait.

**Remembrance Day Wreath** – Ivy and Charles arranged for them and who is going to lay it.

**Village Hall Parking on Playing Field** – This was resolved with the village hall and it was agreed that parking would be assessed on the field in terms of the wetness of the field ongoing for each event. If too wet and conditions not suitable for parking then this won't be the case.
